-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 20, 21, 29 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Bluhm.

Bluhm discloses a disk brake comprising a brake pad having a lining support (3) and a friction lining (1), at least one stud being mounted on the lining support for fixing the friction lining, wherein the stud passes through the fixing lining at least from approximately the middle thereof up to the lining surface.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 22 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bluhm in view of Biswas.

Art Unit: 3683

Re claim 22, Bluhm does not teach wherein the stud is welded onto the lining support. Biswas teaches wherein a stud (22) is welded onto a lining support (16). It would have been obvious to one of ordinary skill in the art at the time the invention was made to weld the stud to the lining support since welding is a well known means for connecting.

Re claim 28, Bluhm does not teach an underlayer provided between the lining support and the friction lining. Biswas teaches an underlayer (18, 20) provided between the lining support and the friction lining. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide an underlayer between the lining support and the friction lining for damping purposes.

#### ***Allowable Subject Matter***

5. Claims 31-38 are allowed.
6. Claims 23-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3683

Chase teaches a brake pad having a lining support and a friction lining, at least one stud being mounted on the lining support for fixing the friction lining, wherein the stud passes through the fixing lining at least from approximately the middle thereof up to the lining surface.
